

Rifton Activity Chair

A chair for everything.

The Rifton Activity Chair is a versatile positioning chair suitable for most children with special needs, designed for use at **home and in the classroom**.

Choose a standard base or the hi/lo base, which allows height adjustment while in use, as well as 6 colour options.

All Rifton Activity Chairs are equipped with a quick-adjusting **tilt-in-space** feature.

Features

Designed for small children to young adults, with room to grow. Choose between the small, medium, or large Activity Chair.

Simple, **tool-free adjustments** to suit each user's unique requirements in clinical settings.

Standard base

Adjustable back and tilt-in-space comes standard on all Activity Chairs.

Hi/Lo base

Height adjustable with a foot pump for medium and large bases.

Accessories

Headrests

Choose a flat, contoured or winged headrest for positioning clients with poor head control.

Laterals

Independently adjustable, laterals are important for proper alignment of the spine.

Adjustable legs with casters

Height adjustable and locking casters for easy travel.

Footboard

Facilitates weight-bearing for transfers, and can be flipped up and out of the way for convenience.
