

Rifton Stander

A total redesign of Rifton's stander.

The Rifton Stander can be configured as supine, prone or multi-position, and allows hip abduction up to 30° to promote hip joint development.

All this function is contained within an elegant and approachable design that centers the child while opening worlds of possibility. Available in red and blue.

 Move between **activity level** and **eye-level** within seconds for smoother social interaction.

Features

Tilt adjustments from 0° to 90°, with the legs offering up to 30° of abduction.

Quick and easy conversion between prone and supine for the MPS with tool-free adjustments.

Comes standard with Anti-tip caster and 8" locking wheels.

The open frame design allows for easy transfers and access to surroundings.

Options & Accessories

Leg Types

The standard legs allow for hip abduction, while advanced legs include hip and knee flexion.

Tray

The angle adjusts easily for prone and supine use, and swings away for transfers.

Trunk Strap

The trunk strap wraps around the user and provides rotational stabilisation.

Head Laterals (Supine only)

Mount on the headrest and adjust independently in height and width.

Butterfly Harness

Can be used instead of the trunk strap for greater upper trunk stabilization.

+ 6 More

A stander that grows with you.

The Rifton Stander and accessories are designed with adjustability in mind to suit each user.

Size	Max Weight	User Height	Trunk Lateral Width	Footprint
1	34 kg	71-107 cm	14-25 cm	81 x 55 cm
2	45 kg	97-135 cm	18-29 cm	99 x 69 cm
