1. Explanation of symbols in the manual

This manual includes different font and symbol to improve readability and understanding. Please refer to following sample:

- Standard font—general information
- **Boldfaced** font—important word or phrase
- Note—important information or indication
- The following symbol means “warning”

“Warning” means the operation may menace the safety of user or operator. Act against may cause the damage to user or operator.

“Warning” includes

- Dangerous: beware of pinch
- Dangerous: beware of electricity shock
- The regulation or measure which the operator must obey to avoid damage of device.

2. Introduction of product

This trolley offers an easy way for persons who have a leg injury or who unable to transfer independently from a chair, sofa, wheelchair, or toilet. It makes nursing much easier and safer and makes it much easier for persons to participate in daily life and the Carer has a more positive,easier and pleasant experience. It helps with OH&S issues.

3. Main purposes and application scope

The trolley is used in the family or nursing home where there is need to transfer patients.

4. Main technical parameters

Seat board turn:	150°
Trolley size: (Standard size)	800 (L) ±20*615 (W) ±20*1070 (H) ±20
Front castor diameter:	Φ75mm
Rear castor diameter:	Φ100mm with brake
Trolley weight:	24kg
Loading capacity:	200kg
Note: The parts which directly contact the human body is foamed PU material. The parameters are subject to changes without prior notice.
